IN-13 VU SOUND LEVEL METER
WITH AUTOMATIC GAIN CONTROL

DANGER!!! HIGH VOLTAGES!!!
USE AT YOUR OWN RISK

NOTES

1) Use any P-Channel JFET with cutoff Vgs of about 2 volts.
   Fairchild J177 or NTE-489 or similar.

2) Audio input signal should be "line level" - approx. 1 volt peak
   to peak. That is roughly the level of the speaker output of a
   computer sound card or the earphone output of an iPod at
   medium-high volume.
